FOR IMMEDIATE RELEASE

Teton County Health Department Offers Flu Clinics

Jackson, WY-September 24th, 2018- Health Department officials are encouraging people in the community to get vaccinated for flu and are providing walk in flu clinics to the public.

People looking for a flu shot may visit the Health Department located at 460 Pearl Ave. anytime between 8:00 a.m. and 5:00 p.m. Tuesdays and Thursdays through November 15th. **All our vaccine this year is mercury and preservative free.** We will have quadrivalent vaccine, meaning that it provides protection against four strains of the flu virus, and high dose vaccine for adults 65+. Anyone looking to receive a vaccine in addition to a flu shot may call the Health Department for an appointment.

We accept most insurances for payment, cash, checks or credit cards. Please check with your health insurance provider to see if a flu shot is covered by your plan. A same day cash discount is available for \$30 for the quadrivalent vaccine. If the Health Department charges your insurance company for your flu shot and your insurance plan does not cover flu shots you will be responsible for the paying the entire bill, which would include \$25 for the flu shot and \$20 for an administrative fee.

Questions about the clinics or vaccines may be directed to the Teton County Health Department at 307.733.6401

In addition to the Teton County Health Department other area pharmacies and healthcare providers will have flu vaccine available. Please contact your preferred provider for more information on their vaccine availability.
